Address: North Kargar Street, Amirabad, Tehran, Iran

About Me

M.Sc. in Computer Engineering (Software Engineering); Experienced in full-stack development, software engineering, security, and encryption using modern technologies. Since starting my master's, I have also been working in data analysis, NLP, LLMs, LangChain, GraphChain, Agents, and related fields.

I prefer serving my country over working abroad and wish to work in areas where my skills are most needed.

Overall, with strong skills across diverse fields and experience with various frameworks, I enjoy learning and gaining new experience.

Education

Master of Science in Software Engineering

University of Tehran
Major: Software Engineering
GPA: Studying
2023 - Present

Bachelor of Science in Software Engineering

Shahid Rajaee Teacher Training University
Major: Software Engineering
GPA: 18.31/20
2018 - 2022

Diploma in Mathematics and Physics

Shahid Beheshti High School
Major: Mathematics and Physics
GPA: 19.38/20
2015 - 2018

Work Experience

Senior Developer

Pars Technology Company

2023 - 2024

- Creating a native messaging app for specific groups
- Development of custom VPN/proxy solutions
- Analyze, test, and write algorithms for post-quantum encryption
- Mentoring and training novice developers

Network and Hardware Intern

Shahid Rajaee University

2021 - 2022

- Troubleshooting and fixing site problems
- Repairing and upgrading faulty systems

Full stack

Shahid Rajaee University

2020 - 2021

- Designing a pre-registration system for student department selection
- Implementing an authentication system
- Developing reusable components
- SEO and website performance optimization

Skills

Programming Languages

- c
- c++
- c#
- HTML
- CSS
- JavaScript
- PHP
- Go
- Python

Frameworks & Libraries

- Qt
- Jupyter
- Django
- Transformers
- Datasets

Tools & Technologies

- Git
- Docker
- Hugging Face
- Colab
- Kaggle

Projects

Queen-McCluskey

Obtaining PI and EPI numbers in logic circuits automatically

C++

C

Qt

[View on GitHub](#)

Native messenger

Creating a messaging application based on quantum post encryption for specific groups

C

Python

React

TypeScript

Node.js

MongoDB

[View on GitHub](#)

Unit selection system

Design and development of a system for preregistration of student unit selection

HTML

CSS

JavaScript

PHP

MySQL

[View on GitHub](#)

Online bookstore design

A store with all the necessary features to buy books, track and view order status, and add comments for books.

Achievements and Honors

Rank 17 in the Master's Degree Entrance Exam

National Organization of Educational Testing

2023

Among the top 10% of brilliant talents

Educational Management of Shahid Rajaei University

2020

Representative of total entries in 97 computer disciplines

Dean of the Computer Engineering Faculty

2019

Memberships

International Student Organization

Special member

2025 - present

Tarhvelayat Alumni Association

Volunteer

2019 - present

Volunteer Activities

Programming Workshop Instructor

Scientific Association of the Faculty of Computer Engineering

2019 - 2024

Interests

Natural Language Processing (NLP)

Data Mining

Question Answering

Artificial Intelligence (AI)

Machine Learning (ML)

Deep Learning

Large Language Models (LLMs)

Error Troubleshooting

Software Development and Security
